

TRI-DOSE - Just One Dose for Reef Balance

Product Overview

Tri-Dose is a premium 3-in-1 reef supplement designed to simplify reef aquarium care by delivering balanced levels of Calcium (Ca), Magnesium (Mg), and Alkalinity (KH). These elements are essential for coral growth, skeletal development, and maintaining a stable marine environment.

Why Is Balance So Important in a Reef Tank?

In a closed reef system, essential minerals are consumed daily by corals and other marine organisms. An imbalance in these elements can lead to poor growth, color loss, and unstable pH. Tri-Dose helps maintain harmony by delivering the necessary components in a scientifically balanced formula.

Key Benefits

- Encourages healthy skeletal formation and vibrant coloration
- Replaces multiple supplements with a single daily dose
- Stabilizes critical parameters to promote coral vitality
- Fortified with essential trace elements

Dosing Instructions

Shake well before use. Dose 5 ml per 100 litres (26 US gallons) of aquarium water daily.

Start with half the recommended dose and gradually increase while monitoring your reef's response.

Do not overdose.

Dose into a high-flow area for best distribution. Regular testing of Calcium, Magnesium, and Alkalinity is recommended.

Ingredients

Contains a blend of organically bound calcium, along with carefully balanced magnesium and strontium compounds. Also includes a full spectrum of trace elements essential for reef health, such as boron, barium, bromine, fluorine, iodine, iron, lithium, cobalt, copper, manganese, molybdenum, nickel, selenium, vanadium, chromium, and zinc.

Storage & Safety

Store in a cool, dry place away from direct sunlight. Keep out of reach of children. Do not mix directly with other additives.
